

We are asking that you perform a quick bandwidth test to insure that you can successfully connect using Zoom. You need to have at least 3MBps upload and download for a successful Zoom session. Below are some free links to use to check your connection speeds.

Please remember that internet speed test results will only be as fast as your device can support. Wireless connections may not yield the maximum speed your package offers because your computer, laptop, iPad, phone, etc. may not be able to keep up/support your Internet Service Provider's speeds.

Free online test: <https://www.speedtest.net/>

Spectrum speed test: <https://www.spectrum.com/internet/speedtest-only>

Frontier speed test: <http://speedtest.frontier.com/speedtest.html>
